

COUNTY OF HIDALGO

SUBJECT: AH1N1 Flu (Swine Influenza)

SITUATION REPORT #10

DATE AND TIME COVERED: Wednesday, May 13, 2009, 15:00 – Friday, May 15, 2009, 16:30

1. **CURRENT SITUATION:** Emergency Operations Center (EOC) is non-active at this time; however, Hidalgo County Public Health Preparedness and Response Unit has continued their surveillance operations.

As of May 15, 2009, 15:00, Hidalgo County Health & Human Services has received notification from the Texas Department of State Health Services (DSHS) that **in the County of Hidalgo, there are thirty (30) confirmed cases, twenty-seven (27) probable cases and 564 suspect cases, and thirty (30) hospitalized influenza like illness (ILI) cases.** Suspect is defined as exhibiting ALL of the following symptoms: Fever above 102.5 degrees, body ache, diarrhea, vomiting, respiratory complications, sore throat and coughing.

Date	Suspected	Probable	Confirmed	Hospitalized	Deaths
05/01/09	74	1	0	0	0
05/02/09	111	1	0	0	0
05/03/09 08:30	147	1	0	0	0
05/03/09 13:30	197	2	0	0	0
5/04/09	225	1	1	0	0
5/05/09 10:00	243	1	1	0	0
5/05/09	243	3	1	0	0
5/06/09 10:00	262	4	1	0	0
5/06/09 17:00	262	4	1	0	0
5/07/09	286	6	1	2	0
5/07/09 16:30	307	6	1	11	0
5/08/09 9:30	344	6	1	11	0
5/08/09 15:30	391	6	1	13	0

5/13/09 15:00	518	9	14	30	0
5/15/09 15:00	564	27	30	30	0

Please note that all hospitalized cases have been in and out of the hospital.

You will notice that our total numbers of confirmed cases has risen. This is NOT due to an outbreak but to our state laboratory's ability to now confirm cases. Specimens are no longer being sent to CDC for confirmation (since our state lab in Austin can now do the confirmations) and so we are receiving results faster than we were before.

Orders have not been issued by the Center for Disease Control and Prevention (CDC) or DSHS for the use of masks for the general public. The only masking recommendations are as follows: For emergency responders, law enforcement, hospital emergency room staff, only, while in the presence of suspected infection. If a patient or client exhibits flu-like symptoms, mask the patient/client in question. This is a droplet borne disease, not airborne. Follow Tuberculosis (TB) protocols and use droplet precautions. School districts may decide on their own if masks should be used in their schools, but it has not been ordered or recommended by the CDC or DSHS.

Hidalgo County is working with UT Rural Health Studies to gather data from this event for analysis.

Hidalgo County has received rapid tests to be distributed to Federally Qualified Health Clinics, upon request. DSHS has recommended that testing should only be ordered for the most critical patients.

Hidalgo County has received antiviral medications, Relenza & Tamiflu. Distribution to Federally Qualified Health Clinics is directly from the State. There is no shortage of meds at this time.

Hidalgo County has activated the Hidalgo County Flu Information Hotline, open during normal County business hours, from 8am-5pm, Monday thru Friday. The number is 1-866-613-5277. The hotline will not be active on the weekend.

The Hidalgo County Prescription Drug Discount Card does provide a discount for Tamiflu & Relenza, with a valid doctor's prescription, at a local participating pharmacy. For more information or for a card, contact the Hidalgo County Judge's Office, 956-318-2600 or visit the Hidalgo County website: www.co.hidalgo.tx.us/pharmacy.

HEB has been contracted by the State to distribute free or discounted Tamiflu and Relenza to families in need. Hidalgo County is working with local pharmacies to distribute free or discounted meds as well.

School Closures: NONE

Hidalgo County Health & Human Services does not recommend cancellation of school or child activities. If any child involved in the school or child activity shows any of the flu-like symptoms, send the child home. The only school activities to consider cancelling would be those activities involving students with medical special needs, whom are more susceptible to contracting the H1N1 flu.

With schools going back to session, Hidalgo County Health & Human Services recommends for schools to diligently monitor flu-like illnesses in their school, as well as absenteeism.

Travel: Airlines maintain a high level of alert, and is at their discretion of who may board and who may not board, based on the airline's assessment of the traveler at check-in.

Texas Education Agency: For information, visit www.tea.state.tx.us. For information about UIL events, academic or athletic, visit www.uil.utexas.edu, for the adjusted calendar. UIL will resumed normal operations beginning May 11, 2009.

Texas Department of State Health Services: For general information use the DSHS website: www.dshs.state.tx.us/swineflu. DSHS has also created a website, www.texasflu.org, for Texas flu information, as well as the option to sign up for email alerts as information changes. DSHS has declared the H1N1 influenza as a regular flu, not as lethal as originally thought.

State Operations Center (SOC): For the SOC situation report, visit the Governor's Division of Emergency Management website: www.txdps.state.tx.us/dem.

United States Health & Human Services (HHS): For national H1N1 Flu information and associated travel alerts, the CDC website is: <http://www.cdc.gov/swineflu/>.

2. AREAS AFFECTED BY EVENT:

LRGV Regional Impact: Cameron County, Hidalgo County, Starr County, Willacy County.

Hidalgo County Impact: County-Wide

3. RESPONDING AGENCIES/ORGANIZATIONS AND RESOURCES COMMITTED:

Health & Human Services	Incident Command / Surveillance
Emergency Services Division	Support staff for IC, Sit Rep
County Judge's Office	Public Information
UT Rural Health Studies	Analyst support

4. CASUALTIES: No fatalities in Hidalgo County.

5. EVACUATIONS: None.

6. SHELTERS: None.
